

# **FINAL PROJECT**

## **CSPL101**

**BSCS - 3A**

Prince Daniel Mampusti  
Kurt Vincent Magcawas  
Dhan Eldrin Mabilangan

# Introduction

**Title: Analysen Kompass**

Engaging Users in Interactive Polling

# User Profiles

- Each user has a profile that includes demographic information (eg. sex).
- This data can be used to analyze voting patterns and trends.

# User Interaction

- Each survey contains multiple polls, offering different choices for users to express their opinions.
- Users can vote for their preferred choice in each poll.

# Purpose

Our platform is designed to conduct online surveys, providing a space for users to create and participate in various polls.

# Technology Used

- Python - Programming Language
- Django - Web framework
- HTML - Structuring Webpage
- CSS - Designing Webpage
- HTMX - Webpage Events
- plotly - Data Visualization Library
- pandas - Data Analysis and Manipulation

# Data Visualization

- The platform has functionality to filter and visualize voting data based on user demographic (eg. sex).
- This allows for deeper insights into user preferences and behaviors

# How often do you use ChatGPT?

## Tables

Whole Data Summary

Statistic	Data
count	4
mean	50
std	2.943920288775949
min	47
25%	48.5
50%	49.5
75%	51
max	54

Sex Data Summary

Statistic	Male	Female
count	4	4
mean	25.25	24.75
std	3.304037933599835	1.2583057392117916
min	21	23
25%	24	24.5
50%	25.5	25
75%	26.75	25.25
